IDESTA ESS-NORM® CONTAINERS

As long ago as 1971, IDESTA became the first and only Scandinavian manufacturer to adopt the Gastronorm sizing standard, which is today the self-evident standard for all manufacturers and users of professional kitchen equipment. The Gastronorm system is based on the basic module of 325x530 mm, the sizes of which can be doubled or divided into two, three, four, six or nine parts.

To accommodate the Scandinavian market, Idesta established the, now market leading, ESS-NORM® system, which is compatible with the Gastronorm system.

ESS-NORM® ensures compatibility regarding lid fits and stacking of the different containers. ESS-NORM® containers are manufactured in 0.8 mm high quality 18/8 stainless steel, electrolytically polished to a finish that satisfies the highest hygienic demands. They meet the European Norm for materials used in connection with food processing, EN 631. Features such as lugs to facilitate stacking and foldable handles ensure fulfilment of any demands that can be placed on a stainless steel container. The range is completed with hermetic lids, perforated inserts, lids with and without handles, domed lids etc., making it possible to adapt containers to any requirement.

IDESTA ESS-NORM® implies containers for rational, safe and economical professional kitchen applications. They have unsurpassed durability, which means that operating costs and environmental impact are minimised.

IDESTA ABC CONTAINERS

IDESTA ABC professional kitchen containers are manufactured according to EN 631 standards.

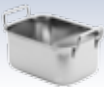

IDESTA's ABC containers are sold worldwide and serve food on all corners of the earth. The nine sizes make it possible to use exactly the right container for the specific preparation, transport or serving purpose.

ABC containers are manufactured in high quality 18/8 stainless steel, electrolytically polished to a finish that satisfies the highest hygienic demands. They fulfil the European Norm for materials used in connection with food processing, EN 631. Extensive service life is guaranteed through the use of 0.8-1 mm thick steel.

They have unsurpassed durability, which means that operating costs and environmental impact are kept to a minimum.

Idesta was established as a trademark in 1929 by the internationally renowned architect Sigurd Lewerentz. He started up in Eskilstuna, Sweden producing window and door sections in metal, which he named Idesta.

The logo for Idesta, featuring a blue lowercase 'i' with a dot, followed by the word 'IDESTA' in a bold, blue, uppercase sans-serif font.

Today Idesta is a family owned company group, active in a number of different sectors. The Idesta trademark lives on within its original manufacturing area of metal sections but has now developed into a leading player in the Scandinavian professional kitchen equipment market.

Other trademarks in the Idesta group include SDX, Cambro, Hamilton Beach and Edlund.

The Idesta logo, consisting of a blue lowercase 'i' with a dot and the word 'IDESTA' in a bold, blue, uppercase sans-serif font.
