

Idesta ESS-Norm[®] containers

As early as 1971, IDESTA became the first and only Nordic manufacturer to join the measurement system that is now an obvious standard for all manufacturers and users of commercial kitchen equipment. The Gastronorm system is based on a 325x530 mm area, which can then be doubled or divided into two, three, four, six or nine sections.

For the Nordic market, Idesta established the now market-leading ESS-NORM[®] system which is compatible with the Gastronorm system. ESS-NORM[®] ensures the correct fit for lids and stacking of containers.

The ESS-NORM[®] containers are made from 0.8 mm high-quality, stainless 18/8 steel. They satisfy the European Standard for materials and articles in contact with foodstuffs, EN 631. Details such as embossed lip for stacking and disappearing handles ensure compliance with the requirements that may be imposed on a stainless container. The range is complete with hermetically sealed lids, perforated inserts, lids with and without handles and dome lids, etc. which allow the containers to be adapted to each task and need.

IDESTA ESS-NORM[®] means containers for rational, safe and economical commercial kitchen operation. The durability is unsurpassed which results in the lowest operating costs and least environmental impact.

TERMS AND CONDITIONS

Terms and conditions are valid until further notice. All prices are in EURO. Terms of delivery are Ex. Works Malmö. Packing costs will be added. Payment: After due date interest will be charged with 20%. The goods will be IDESTA property until the invoice has been paid. IDESTA FOODTECH AB. Current from 2024-09-01

ABC Containers

IDESTA ABC commercial kitchen containers are manufactured according to Swedish hospital standards. IDESTA's ABC containers are sold globally and are used to serve food around the world. The nine sizes means you can adapt the container according to the preparation, transport or serving needs.

The ABC containers are made from high-quality, stainless 18/8 steel, electropolished to a surface finish that meets high hygienic requirements. They satisfy the European Standard for materials and articles in contact with foodstuffs, EN 631. Using a sheet thickness of 0.8–1 mm guarantees a long service life.

The durability is unsurpassed which results in the lowest operating costs and least environmental impact.
